

TIKKURILA

LIUKUESTE

ADDITIVE FOR METAL ROOF AND FLOOR PAINTS

- DESCRIPTION** Additive consisting of hollow, lightweight silicate microspheres with a maximum grain size of approximately 300 µm.
- RECOMMENDED USES** Used as a non-slip agent for Tikkurila's sheet metal roof and floor paints, such as Akvacoat, Betolux, Betolux Akva, Novopox, Permo Lattiamaaali, Panssarimaaali and Panssari Akva sheet metal roof paint.
- PRODUCT FEATURES** Particularly suitable for use as a non-slip agent for sheet metal roof paints.

LIUKUESTE

TECHNICAL DATA

Colour Shades	Grey
Can sizes	0.333 l
Density (kg/l)	approx. 0.4 g/cm ³
Special feature	Bulk density approx. 0.4 g/cm ³ . The maximum grain size of the microspheres is approximately 300 µm.
Average wall thickness	5-10 % pallon halkaisijasta.
Hardness	5 Mohin asteikolla.
Grain size	Mikropallojen maksimiraekoko on noin 300 µm.
Melting temperature	1200 – 1350 °C.
Storage	Keep package tightly closed to prevent dusting and wetting.

LIUKUESTE

APPLICATION INSTRUCTIONS

Mixing components

The Non-Slip powder is added in the top coat layer.

Mixing ratio: 1/3 litres of Non-Slip powder is added into 10 litres of paint. Accordingly less than a third of 1/3 l package is added into 3 litres of paint.

See more detailed instructions and mixing ratio in the Product Data Sheet of the paint to be used.

At least two paint layers have to be applied when using Liukueste. Add the non-slip powder to the finishing coat. Mixing ratio: 1/3 liter can (approx. 150 g) of non-slip powder to 10 liters of paint. Correspondingly, add a little less than a third of 1/3 liter can to 3 liters of paint. For more detailed directions for use and the mixing ratio, see the product data sheet of your paint product.
