# Pinja Color Plus

A WATER-BORNE WOOD STAIN WITH  
EXCELLENT MOISTURE RESISTANCE

# When you need exceptional UV and weather resistance

PINJA COLOR PLUS IS A WATER-BORNE, SEMI-TRANSPARENT WOOD STAIN

## Durability and versatility you can rely on

Pinja Color Plus is a water-borne tintable, semi-transparent wood stain that provides exceptional UV and weather resistance for planed, sawn, impregnated and thermally treated wood surfaces such as timber cladding, window frames, doors, garden fencing and laminated logs. It forms an elastic film with low water absorption and excellent colour retention, protecting wood against moisture, sunlight, surface mould and dirt, and offering a maintenance interval that is twice as long as conventional wood stains.

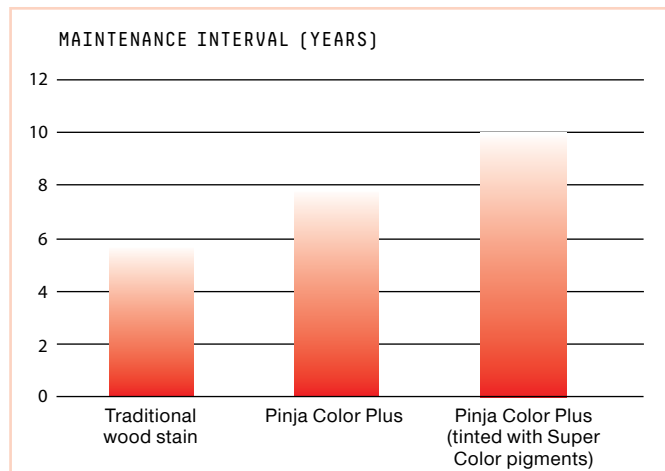

The product has two base paint options – one colourless and the other containing yellow and red oxide transparent pigments, which offer superior sunlight resistance.

Pinja Color Plus can be tinted to a variety of long-lasting transparent and semi-transparent shades.

### BENEFITS

- ☒ LONG MAINTENANCE INTERVAL
- ☒ CAN BE USED IN NORDIC SWAN ECOLABELLED BUILDINGS
- ☒ EXCELLENT WEATHER AND UV RESISTANCE

For application instructions please refer to the product data sheet.

The maximum weather resistance and maintenance interval can be obtained using Super Color pigments.

The maintenance interval is a rough estimate as it depends on the structural features, geographic location and orientation of the object.
