# Ultra Classic

A HIGH-QUALITY SEMI-MATT PAINT FOR  
WOODEN FAÇADES

# Protection that's sustainable and beautiful

Ultra Classic is a new generation of high-quality semi-matt paint for wooden buildings. It is ideal for both new and previously treated surfaces, forming a protective paint film that protects against mould to make the surface extra durable.

According to special accelerated tests that replicate harsh weather conditions, Ultra Classic paint shows excellent long-term colour and gloss retention, helping to keep painted surfaces looking beautiful for longer. Façades painted with Ultra Classic also effectively repel dirt, making surfaces look clean and freshly painted.

## Forming a protective paint film that protects against mould to make the surface extra durable

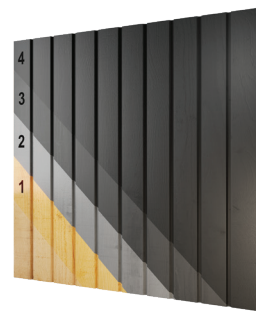

### New surface

Priming oil: *Valtti Plus Pohjuste*  
(one coat)

Primer: *Ultra Primer*  
(one coat)

Paint: *Ultra Classic*  
(two coats)

### Previously treated surface in good condition

Paint: *Ultra Classic*  
(one coat)

### Previously treated surface in poor condition

Priming oil: *Valtti Plus Pohjuste*  
(one coat)

Primer: *Ultra Primer*  
(one coat)

Paint: *Ultra Classic*  
(two coats)

Ultra Classic is easy to apply with a brush; it can also be sprayed without brushing afterwards. Thanks to the product's special rain-safe technology, paintwork won't be damaged even if rain starts as little as an hour after painting.

The Nordic Swan Ecolabel guarantees that Ultra Classic paint is a sustainable and durable choice for wooden buildings everywhere.

VOLUME	0.9 L, 2.7 L, 9 L, 18 L
COLOUR	Tikkurila Façade 760
GLOSS VALUE	Semi-matt
COVERAGE	Sawn wood: 4–6 m <sup>2</sup> /l. Planed and previously painted wood: 7–9 m <sup>2</sup> /l.
