

Temalac ML 90

DESCRIPTION

A high-gloss, one-component alkyd topcoat.

PRODUCT FEATURES AND RECOMMENDED USES

- · Used when there is a high demand for color and gloss retention
- Gives the surface a high-quality appearance. It is the perfect choice when an easy-to-apply product with an esthetic appearance is required
- · Good gloss and colour retention when exposed to weathering
- Can be applied using a "wet-on-wet" painting technique
- · Suitable for industrial finishing
- Recommended uses: small tanks, agricultural machinery, haulage equipment and other machinery and equipment

TECHNICAL DATA

Volume solids 45±2% (ISO 3233)

Weight solids 57±2%

Specific gravity 0.9–1.1 kg / I depending on colour.

Recommended film thicknesses and theoretical coverage

Recommended film thicknesses		Theoretical coverage	
wet	dry		
90µm	40μm	11.2 m²/l	
135µm	60μm	7.5 m²/l	

Practical coverage depends on the application method, painting conditions and the shape and roughness of the surface to be coated.

Drying time

DFT 40µm	+10°C	+23°C	+35°C
Dust dry, after	2h	1h	½h
Touch dry, after	8h	5h	3h
Recoatable, after	36h	24h	16h
Recoatable, "wet-on-wet", after		½–1h	
Touch dry 1h / 60°C, ½h / 80°C			

Drying and recoating times are related to the film thickness, temperature, the relative humidity of the air and ventilation.

Gloss Full gloss.

Color shades RAL, NCS, SSG, BS, MONICOLOR NOVA and SYMPHONY colour cards. Temaspeed

Premium tinting.

Temalac ML 90

APPLICATION INSTRUCTIONS

Surface preparation Primed surfaces: Oil, grease, salt and dirt are removed from the surface by appropriate

means. Repair any damage to the primer coat. Note the overcoating time of primer. (ISO

12944-4)

Recommended primers Temaprime EE, Temaprime EUR, Temaprime GF.

Recommended topcoats Temalac ML 90.

Application conditions All surfaces must be clean, dry and free from contamination. The temperature of the

ambient air, surface and paint should not fall below +5°C during application and drying. Relative humidity of the air should not exceed 80% during application and drying. The surface temperature of steel should remain at least 3°C above the dew point. Good ventilation and sufficient air movement is required in confined areas during application

and drying.

Application Stir the product carefully before use.

For airless spraying, the product is thinned approximately 0–10%. Recommended nozzle tip is 0.011"–0.015" and pressure 140–180 bar. Spray angle shall be chosen according to

the shape of the object.

For brush application product should be thinned according to the circumstances.

The best finish is obtained using a "wet-on-wet" technique, with 5–30 minutes

evaporating intervals.

Thinners Thinner 1006

At spray application Thinner 1006. At brush application Thinner 1050.

Cleaning of equipment Thinner 1006 or Thinner 1050.

VOC The Volatile Organic Compounds amount is 460 g/litre of paint.

VOC content of the paint (thinned 10% by volume) is 500 g/l.

HEALTH AND SAFETY Containers are provided with safety labels, which should be observed. Further information

about hazardous influences and protection are detailed in individual health and safety data

sheets.

A health and safety data sheet is available on request from Tikkurila Oyj.
