Finngard Silicone Allweather paint

A WATER-BORNE, SILICONE-MODIFIED
PAINT FOR MINERAL FAÇADES

Never mind the weather

FAÇADE PAINTING IS OFTEN RESTRICTED BY WEATHER CONDITIONS AT THE TIME OF APPLICATION. FINNGARD SILICONE ALLWEATHER HELPS YOU KEEP TO YOUR SCHEDULE AND BECOME LESS DEPENDENT ON THE WEATHER.

Finngard Silicone Allweather is a water-borne, silicone-modified façade paint that protects concrete structures and surfaces rendered with a cement-rich mortar against humidity and carbonation (CE marked according to EN 1504-2).

Extend the painting season

Finngard Silicone Allweather paint has excellent resistance against early rain even in cold and humid weather. This, combined with its wide application temperature range (+2 °C to +30 °C), means painting can be started earlier in the spring and extended later into the autumn.

Paint two coats a day

Finngard Silicone Allweather paint is easy to apply and dries quickly. It can be recoated after three hours, making it possible to apply two coats during one working day.

Obtain a high-quality end result

Finngard Silicone Allweather paint offers excellent coverage, colour retention and durability. It is available in hundreds of colours and provides a seamless, smooth finish.
